

```
--0. In English: Show the name, title and salary of all
--    people who earn less than 170,000 or more than 250,000
--    and show them first sorted by title descending and then by
--    salary ascending
use mydbase
go
select Name as 'First Name',
        Title as 'Employee Title',
        [Money Earned] as Salary
from table_1
where [Money Earned] not between 170000 and 250000
order by Title desc,Salary
--1. grab the table with from
--2. where runs to select the records we want
--3. select runs to get the columns we want
--4. order by runs last and therefore Salary can be used in the
--5. order by
