

--1. stored procedures are blocks of code that we create once

-- and we can then reuse

use AdventureWorks2014

go

create procedure GetTotalQuantities

as

```
select Sum(OrderQty) as Total
from Sales.SalesOrderDetail
group by SalesOrderID
```

go

alter procedure GetTotalQuantities

as

```
select SalesOrderID, Sum(OrderQty) as Total
from Sales.SalesOrderDetail
group by SalesOrderID
```

go

GetTotalQuantities
