

- 1. importing CSV (comma separated files)
- 2. joining them in a common table expression
- 3. selecting records from the common table expression
- 4. drop table SalesAmounts, SalesPeople

```
bulk insert SalesPeople
from 'C:\Data\SalesPeople.csv'
with
(
    FIRSTROW=2,
    FIELDTERMINATOR=',',
    ROWTERMINATOR='\n'
)
select * from SalesPeople
```

```
bulk insert SalesAmounts
from 'C:\Data\SalesAmounts.csv'
with
(
    FIRSTROW=2,
    FIELDTERMINATOR=',',
    ROWTERMINATOR='\n'
)
select * from SalesAmounts;
```

```
With JoinCTE (Name,SalesAmount)
As
(
    Select Name, Sum(Amount) as TotalSales
    from
    SalesPeople as s inner join SalesAmounts as a on s.SalesPersonID=a.SalesPersonID
    group by Name
)
select * from JoinCTE
```
